

TIED AND TRUE

Bring onboard all you want—and more—the next time you head out on your Bayliner, and let BuoyRope eliminate the hassle. The BuoyRope’s two-in-one method surpasses traditional ropes and bungee cords with a safer, more secure way to tie up your Bayliner or strap down water toys and other items while underway. Simply loop the BuoyRope through itself to fasten to a point of contact, and then use the provided military-grade steel S-clips to link any items to one or more of the rope’s additional loops. The fast, easy and versatile system also makes it a breeze to tie up to your neighbor’s boat while out on the water. “There’s nothing like it for mooring and boat-to-boat chaining,” says Jeff Dahl, president of BuoyRope. For more information on BuoyRope and the land-based LoopRope, visit www.looprope.com.

STOW AWAY!

Bayliner prides itself on building the most storage- and passenger-friendly boats on the water. This year, Bayliner is unveiling a brand-new storage system on the 175 Bowrider and 170 Outboard that’s sure to keep Bayliner way ahead of the pack. The 175’s new motor box includes special cleats for tying down large items like tubes and coolers. And both the 170 and 175 come with new side storage that helps keep their cockpits free of loose gear—which in turn makes for a more comfortable ride.

See more of the redesigned 175 Bowrider on page 12. And for a full report on the all-new 170 Outboard, flip to page 7 of the catalog section.
